EDUCATION

University of California, Berkeley | Berkeley, CA

May 2026

B.A. Data Science, Media Studies | GPA: 3.57

- **Courses:** Introduction to Machine Learning, Principles & Techniques of Data Science, Foundations of Data Science, Data Mining & Analytics, Structure & Interpretation of Computer Programs, Data Structures, Full Stack Web Development

TECHNICAL SKILLS

Programming & Data: Python, SQL, C#, Git, JavaScript, [React.js](#)

Data & Analytics: Pandas, NumPy, Matplotlib, Excel, sci-kit learn

AI & Automation: LangChain, LangGraph, RAG, FAISS, Chroma, REST APIs

Machine Learning Frameworks: PyTorch, Hugging Face, TensorFlow

RELEVANT EXPERIENCE

Google Contract with Generative AI @ Berkeley | Sunnyvale, CA

Jan 2025- May 2025

Applied AI Engineer

- Built a conversational AI assistant that automated enterprise workflow tasks using retrieval-augmented generation (RAG), translating ambiguous user requests into **structured task recommendations**.
- Designed and executed evaluation pipelines across **200+** prompts, analyzing hallucinations, retrieval failures, and instruction-following errors to identify systematic failure modes and improve response quality.
- Curated and labeled semantic prompt datasets to optimize evaluation coverage, ensuring model alignment and testing edge-case constraints.
- Synthesized evaluation findings and recommendations into technical readouts presented biweekly to Google engineers.

Weel | San Francisco, CA

June 2025 - Aug. 2025

Growth Strategy Intern

- Proposed and ran A/B experiments on content and messaging strategies, using Python (Pandas, Matplotlib) to analyze results and surface actionable insights that improved conversion rate for seed-stage startup by **~17%**.
- Built performance summaries and visual reports to communicate campaign insights, user engagement patterns, and growth opportunities to cross-functional stakeholders.
- Analyzed user engagement metrics to identify growth opportunities, informing data-driven decisions to increase user engagement by **13%**.

Berkeley Anova | Berkeley, CA

September 2024 - May 2026

External Vice President

- Led external partnerships, sponsorship outreach, and community-facing initiatives for a student organization expanding equitable access to computer science education.
- Built relationships with partner companies and secured sponsorships, increasing organizational funding by **30%+**.
- Directed outreach and branding initiatives, driving **200%** growth in online engagement and visibility.

PROJECTS

Generating 3D Animation from 2D Children's Drawings | Netflix X GenAI @ Berkeley | [GITHUB](#)

Sept. 2025 - Dec 2025

- Built an **end-to-end AI pipeline** integrating Python inference models into Unity to automate 2D-to-3D generation, rigging, and animation workflows.
- Integrated Python runners using C# Process calls, structured file I/O, JSON metadata, and file-watching logic to connect generation, reconstruction, auto-rigging, and animation stages.
- Debugged pipeline execution issues across C#, Python, model inference scripts, and runtime behavior to improve reliability
- Collaborated across 2D, 3D, rigging, and animation subteams to evaluate model outputs, optimize pipeline performance, and present weekly progress to Netflix engineers.

Enterprise HR Knowledge Assistant | Personal Project | [GITHUB](#)

July 2026 -

- Built an internal HR knowledge assistant that **automates employee access** to enterprise policies using semantic search (Faiss, Chroma) and LLM-powered question answering (OpenAI, LangChain).
- Developed document ingestion pipelines utilizing chunking, embedding generation, and vector indexing to support grounded question answering.
- Implemented **semantic retrieval** and role-aware access mechanisms for HR policy retrieval and conversational assistance.
