EDUCATION

University of California, Berkeley | Berkeley, CA

May 2026

B.A. Data Science, Media Studies | GPA: 3.57

- **Courses:** Introduction to Machine Learning, Principles & Techniques of Data Science, Foundations of Data Science, Data Mining & Analytics, Structure & Interpretation of Computer Programs, Data Structures, Full Stack Web Development

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C#

Machine Learning & LLM systems: PyTorch, TensorFlow, scikit-learn, RAG, Prompt Engineering, LLM Evaluation, Conversational AI

Frameworks: LangChain, LangGraph, FAISS, Chroma

Tools: Git, Jupyter, REST APIs

RELEVANT EXPERIENCE

Google Contract with Generative AI @ Berkeley | Sunnyvale, CA

Jan 2025- May 2025

Applied AI Engineer

- Built a **conversational AI voice assistant** for enterprise workflows, translating ambiguous spoken requests into context-aware task recommendations using modern LLMs and retrieval-augmented generation (**RAG**).
- Designed and executed evaluation pipelines across **200+** prompts, analyzing hallucinations, retrieval failures, and instruction-following errors to identify systematic failure modes and improve response quality.
- Curated and labeled semantic prompt datasets to optimize evaluation coverage, ensuring model alignment and testing edge-case constraints.
- Synthesized evaluation findings and recommendations into technical readouts presented biweekly to Google engineers.

Weel | San Francisco, CA

June 2025 - Aug. 2025

Growth Strategy Intern

- Proposed and ran A/B experiments on content and messaging strategies, using Python (Pandas, Matplotlib) to analyze results and surface actionable insights that improved conversion rate for seed-stage startup by **~17%**.
- Built performance summaries and visual reports to communicate campaign insights, user engagement patterns, and growth opportunities to cross-functional stakeholders.
- Increased user engagement by **13%** through data-driven marketing campaigns and user engagement behavior analysis.

Berkeley Anova | Berkeley, CA

September 2024 - May 2026

External Vice President

- Led external partnerships, sponsorship outreach, and community-facing initiatives for a student organization expanding equitable access to computer science education.
- Built relationships with partner companies and secured sponsorships, increasing organizational funding by **30%+** to support student programming.
- Directed outreach and branding initiatives, driving **200%** growth in online engagement and visibility.

PROJECTS

Enterprise HR Knowledge Assistant (RAG) | Personal Project | [GITHUB](#)

July 2026

- Built a retrieval-augmented **HR knowledge assistant** that answers employee questions over enterprise HR documentation using semantic search and grounded LLM responses.
- Developed a retrieval pipeline including PDF ingestion, recursive chunking, embedding generation, metadata indexing, and vector search to support scalable knowledge retrieval.
- Implemented role-aware retrieval and conducted debugging and evaluation of retrieval behavior, refining chunking strategies, metadata filtering, and retrieval logic to **improve document relevance** while **enforcing access permissions**.

Generating 3D Animation from 2D Children's Drawings | Netflix X GenAI @ Berkeley | [GITHUB](#)

Sept. 2025 - Dec 2025

- Built an **end-to-end AI Python pipeline** that orchestrated AI model inference, asset generation, and downstream processing within Unity.
- Integrated Python runners using C# Process calls, structured file I/O, JSON metadata, and file-watching logic to connect generation, reconstruction, auto-rigging, and animation stages.
- Debugged pipeline execution issues across C#, Python, model inference scripts, and runtime behavior to improve reliability
- Collaborated across 2D, 3D, rigging, and animation subteams to **evaluate model outputs, optimize pipeline performance**, and present weekly progress to Netflix engineers.
